CS2111 Final Project Summary

INSTRUCTIONS: Type out your answer directly below each question. If a question does not apply to your project, type in N/A. When finished, save this file as a PDF and upload it to the Blackboard.

BASICS

Your group members?

Taif Alsulami S20206964 – Rahaf Banat S21107380

What is the topic of your final project?

We have created a website called "GlowUp," which caters to fashion enthusiasts in the Middle East. The website is designed to provide a platform for people to buy clothes and coordinate outfits according to their unique style. We aim to offer a carefully curated selection of clothing items to help users experiment with different companies.

Who is the intended audience?

Everyone would like to buy clothes for men, women, and kids(girls and boys).

Provide a brief summary of the functionalities of your project.

The website that sells clothes offers a product catalog of clothing items with detailed descriptions, images, sizes, colors, and prices. Customers can create user accounts, enabling them to save their personal information. As customers browse through the website, they can add desired items to their shopping carts, which keep track of the selected products, quantities, and prices. Each product includes the product name, size, and color. The website integrates a payment for customers to choose their preferred payment method.

FRONT-END

What is the total page count?

In total, 18 pages: first one login, forget the password, home, glow up, women, men, girls, boys (each one has 3), shopping bag, checkout.

List the names of any external stylesheet used in this project below.

```

How does your project meet the Interactivity requirement?

The "GlowUp" website is an interactive platform catering to fashion enthusiasts in the Middle East. It offers a carefully curated selection of clothing items for men, women, and kids. Users can create accounts to save personal information and preferences. The website features a product catalog with detailed descriptions, images, sizes, colors, and prices. Users can interactively browse the catalog, add items to their shopping carts, and customize their choices. The website integrates a payment system for a seamless checkout experience. Overall, "GlowUp" meets the interactivity requirement by providing personalized experiences, interactive browsing, customization options, and convenient payment integration.

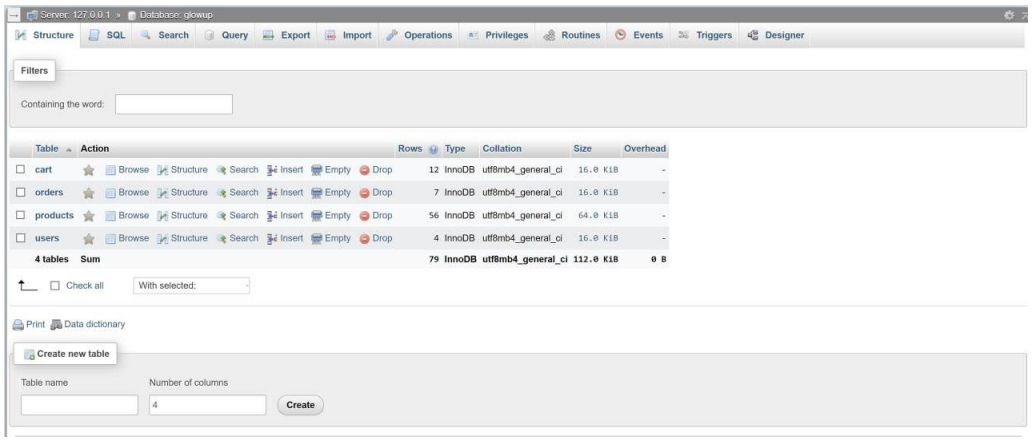
Final Project Report

BACK-END

Attach a screenshot of the final database diagram (just the diagram, do not include any records) below.



Where in your project do you insert a record to the database (the 'C' in CRUD)?

When users create user accounts, add items to their shopping carts, or place orders for clothing items.

Where in your project do you search and display record(s) from the database (the 'R' in CRUD)?

When users browse the website to view products, product details, and other information.

Where in your project do you update and existing record(s) the database (the 'U' in CRUD)?

When users update their account information, edit their cart, or make changes to their orders.

Where in your project do you delete existing record(s) from the database (the 'D' in CRUD)?

When the user removes something from the shopping bag

Final Project Report

If your project requires any admin credentials (i.e. only admin users can access a certain page), list the credentials below.

N/A

Provide any other information that you think the grader/instructor should know when grading your final project below.

We have added some features to our projects. Whenever a user signs in or signs up, a welcome message appears on the screen for 8 seconds, saying "Welcome to GlowUP, <username>!" Additionally, we have added a button with an arrow to the page, which, when clicked, takes the user to the top of the page. We have also implemented a pagination feature that allows the user to navigate between different pages of the website.
